

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. BUFFALO FEMALE ACADEMY.

This institution was organized seven years ago, and is intended to be a seminary of the first class. It was incorporated by the Regents of the University of New York, and is, therefore, in no sense, a private institution, or made to subserve private interests. With this view, the Trustees feel emboldened to urge its claims. Here, are to be found all the means and appliances of thorough and systematic training, and all the advantages for acquiring the polished graces of elegant social life.

The buildings are large and commodious, and are furnished with books and apparatus to aid the pupil in the study of scientific principles. They are situated in the most eligible and delightful part of the city, about half a mile from the principal hotels, and command a beautiful view of the river and the lake. The grounds fronting on Delaware Avenue and extending to a charming private park in the rear, are bounded on the South by Johnson Place, and on the North by Park Place, and are tastefully laid out and ornamented with trees and shrubbery.

The buildings—"Evergreen Cottage" and "Goodell Hall"—combine all that is desirable in size, arrangement and convenience. The former was erected by the late E. Johnson, Esq., for his private residence. It is built of stone, and is exclusively occupied by the family of the Principal, and the young ladies intrusted to his care, as boarders. It has a front of 86 feet facing Delaware Street, and is 74 feet in depth.

The latter, "Goodell Hall," has a front of 100 feet, and is 80 feet in depth, and has been expressly erected for academic instruction; and for spaciousness and convenience, may well challenge comparison with any similar establishment in the country.

It is the purpose of the Trustees to furnish the best instruction in the study of ancient and modern literature; in music, drawing and painting; in mathematics, natural science, philosophy and history; and in all the English branches; so that the pupils may possess every facility for the acquisition of a sound and polished education.

Letters of inquiry may be addressed to Prof. West, the Principal, who will forward circulars containing fuller and more explicit information respecting the institution.

BOARD OF INSTRUCTION.

CHARLES E. WEST, M. D., LL. D., Principal, and Lecturer on Logic, Moral Philosophy, and Natural Sciences.

Dr. NATHAN WEAVER'S

CONCENTRATED EXTRACT OF

A SURE REMEDY FOR

Scrofula, Rheumatism, Dyspepsia, Costiveness, Canker, Salt Rheum, Erysipelas, Piles, Liver Complaint, and Cutaneous Affections, generally, Sore Eyes of long standing, and all diseases arising from an impure state of the Blood.

This Extract is a compound of Vegetables, and contains no mineral substance whatever and is entirely harmless, and at the same time is powerful in its effects, and acts entirely upon the *blood*, from whence all these diseases arise. There are some persons who are much debilitated, and the compound effects them so powerful that they become discouraged. But let all such persevere. Usually after taking the compound from one to five days the patients may think they have a severe cold; the head will be dizzy and often discharge freely, but these disagreeable feelings will soon subside, and the general health will improve and the disease will soon show itself on the surface in blotches or boils. If the medicine is too powerful, take a little less, but take it according to directions.

In every progressive science, periods arrive when a new direction is imparted to its course. These epochs proceed from the discovery of new facts, shedding a light which changes the whole aspect of science. The present is one of this kind, and this great remedy now offered to the afflicted is destined to effect an entire revolution in the treatment of diseases.

The discoverer and proprietor of this compound challenges the world to produce any thing that can vie or excel its intrinsic properties.

TO ALL WHOM THIS MAY CONCERN.

This is to certify that Dr. NATHAN WEAVER, is an eminent Chemist and Physician, and that he practiced under my instructions at Fort Adams, Newport, Rhode Island, and in 1847 I gave him charge of the hospital of the Ninth Regiment of the United States army in the war with Mexico. He was very successful in his practice, and compounded most of the medicines used in the hospital, and his success while practicing in the army was wonderful with diseases common among soldiers, such as Scrofula, Salt Rheum, Scurry, Scald Head, Canker, Rheumatism, &c. I would cheerfully recommend him as worthy of public patronage.

J. STEVENS, U. S. Surgeon.

TESTIMONIALS.

BUFFALO, Feb. 20th, 1857.

DR. WEAVER.—Dear Sir:—I am under great obligations to you for the cure your medicine has done for me, and for the benefit of those afflicted I wish to make it known to this community. I have been sorely afflicted for the last three years with Scrofula, which is well known to a great many in this city and in Syracuse, and I have been under the treatment of some of the most skillful physicians in Syracuse and in Buffalo, and received no benefit whatever. A few weeks since I was persuaded by one of my neighbors to try your Extract, which I commenced using with no hopes of any benefit, but after taking one and one-half bottles I am happy to say that I am entirely well, and my general health has much improved. It is my cordial opinion that your medicine will safely and speedily cure Scrofula in its worst forms; those afflicted can call on me and satisfy themselves.

ORSON BURROWS.

BUFFALO, N. Y., Feb. 23d, 1857.

I used a bottle of Dr. WEAVER'S medicine called Fireweed, against Scrofula with the best success. Since the late Mexican war I have known Dr. WEAVER, he is a skillful physician and Surgeon, and worthy of public patronage.

F. ZEH.

BUFFALO, June 12th, 1857.

We have acted as agents for the past three months, for the sale of Dr. N. WEAVER'S concentrated Extract of Fireweed, and have made large sales to the city and country. We are pleased to say that, up to the present time have not heard of a single case where the medicine has not given the best satisfaction, and the sale is constantly increasing.

HUFF'S LINIMENT.

This article has been thoroughly tested for 20 years in this City and other sections of the country, and has been acknowledged by all who have used it, to be the best external remedy yet known for

MAN OR BEAST.

Rheumatism, Broken Limbs, Ague in the Breast, Sprains and Dislocated Joints, White Swellings and Felons, Contraction of the Cords and Muscles, Burns, Scalds, Cuts and Bruises, Chilblains, and Frozen Feet, External Poison, Galls of all kinds, Ring Bone and Spavin, (if applied when first Lame,) Scratches or Grease, Mange, and Cracked, Heels, Sand Cracks, Curbs, Inflammation of the Eyes.

N. B. For Burns or Scalds, there is no other Remedy excels it, if immediately applied.

DIRECTIONS.

Be careful always to shake the bottle well before using it, and after applying it, see that it is rubbed dry with the hand. In case the callous or swelling cannot be removed by the above application, take flannel double the size you may require, wet with Liniment, and bandage snug, which will draw a blister; this will remove all swellings and curbs from horses. Felons should be wrapped up for 36 hours, and a cure is warranted, if not festered; if festered, lance it and apply as directed. For high Sprains, Saddle and Harness Galls, add an equal quantity of alcohol.

This list embraces about 450. The leading ones for which Buffalo is most noted, are the agricultural, blank book, boat and ship-building, brass, cabinet ware, car and car wheel, coach and harness hardware, steam engines and all the various machine castings and iron works, stove foundries, gold beating, harness and saddle, lantern, oil, last, leather, marble, melodeon, organ, piano forte, steam planing, printing, regalia, pump, saw, and stave establishments and manufactories. The value of the work turned out in 1856, was not far from \$11,000,000 to \$11,500,000. This is in accordance with the views of our best informed and most impartial manufacturing proprietors, and the detail of facts we then obtained. As the stoppage of any of the works did not occur much before October, if we reduce these figures \$1,500,000, we shall have \$10,000,000 as the probable value, at the prices ruling in the middle of the season, of the work turned out in 1857.

Some new establishments were put in operation or completed the past year. The Buffalo Starch Factory, capital \$100,000, became ready for business. A new carriage manufactory has been built. An extensive stove foundry on Scott street, was also built, and went fully into operation. Two large distilleries have been erected, two flouring mills and a paper mill have commenced operations during the year. An extensive beef and pork packing establishment has been built, and many additions have been made to various

works which have found it necessary to enlarge their facilities.

The consumption of raw material must be very large. For instance, take the items of ship and boat building, the value of the work of which turned out was last year about \$1,800,000; the leather manufactories, the yield of which was not less than \$1,500,000; the stove foundries \$600,000; the machine shops not less than this sum; the piano fortes \$300,000 to \$400,000; flouring mills at least \$1,000,000; wholesale boot and shoe factories \$100,000 to \$120,000; distilleries \$400,000, &c., &c., and an imperfect notion may be formed of the coal, lumber, iron, hides, leather, grain, &c., &c., needed here to supply the city demand; these being a tithe only of the grand aggregate.

The position of the city is extremely favorable as a manufacturing town. The collection of raw material of any and the best description, is easy. It may be brought from the most distant points on the lakes, or from the seaboard, without trans-shipment. The distribution of the manufactured article can be made with equal facility. Labor is abundant and reasonable. Coal will soon be, if not now, plenty and cheap as the plentiest and cheapest. Railroad communication with the excellent and inexhaustible coal beds of McKean Co., Pa., a distance only of eighty miles, is on the eve of accomplishment. There is nothing to hinder its becoming great in iron works, similar to Pittsburgh; or in cutlery, like Sheffield; or in copper smelting and manufactories, like Swansea; or in a hundred other branches; except the want of a disposition to invest here, and the absence of the fostering care of capitalists. Were the manufacturing advantages of this locality better known, and were prudent and proper assistance rendered those who should be found struggling in the dawn of their prosperity, were the banking capital sufficiently large so that notes payable at home could at all times get discounts as well as those payable east, the advance of the city in manufacturing wealth and importance would be a certainty to be calculated upon from year to year.

GENERAL EXHIBIT.—The following is a recapitulation of some of the leading items of the exhibit of the trade and commerce of Buffalo for 1857. The most of the aggregates are larger than those of any other inland city on the continent, and suggests that, if such results can be produced without concert of action on the part of the various interests of the city, what may not be accomplished when those interests move in a united body?

SAN FRANCISCO, CAL.

These articles are put up and sold in packages as follows: Bottles in Boxes of One Dozen each. Kegs of Two, Five, Ten and Twenty Gallons each. Barrels from Forty to Fifty Gallons and upwards, each. An extra charge for casks of less than 40 Gallons.

NAMES OF ARTICLES.

Ginger Wine,	Ginger Brandy,	Forest Wine Bitters,
Native Port Wine,	Strawberry Brandy,	Stoughton Bitters,
California Wine,	Cherry Brandy,	Raspberry Syrup,
Raspberry Wine,	Cordials of all kinds,	Syrups of every description,
Blackberry Wine,	Curacao,	Pure Lemon Syrup,
Orange Wine,	Absinthe,	Common Lemon Syrup
Blackberry Brandy,	Essence Peppermint,	Syrup de Gomme.
Raspberry Brandy,	Ext. of Sarsaparilla,	

All articles manufactured by us are warranted to keep in any climate, and retain their same delicious flavors. They are highly concentrated, and put up in packages which are suitable and safe to ship to any port in the world. They are now among the principal articles of export, therefore shipped at the lowest rates.

TO THE TRADE.

We tender our sincere thanks to our patrons and friends, for the very liberal patronage heretofore bestowed upon us, and hope by our future exertions, and by continuing to manufacture every article from the purest and best materials, to retain and extend that patronage, and enhance the well-known high reputation of our goods. Our Wine Cellars, in combination are the most extensive of anything of the kind in the world, containing the pure juice of the finest flavored fruits grown on the Western Continent. We call particular attention to our Native Wines, they being of as fine a flavor, and better than most of the imported.

The benefit to be derived in the use of fresh ripe fruit, is well known to all, and when they cannot be obtained in their original form, they can be had in another—which is, in our Wines, &c. These articles are all prepared respectively in their seasons, from the choicest fruits of their kind, as named on our list,—thus producing their full fine flavors with all the original strength and freshness preserved, which we present in the shape of the best and cheapest Wines ever introduced to the American public; the use of which will give health and vigor to both body and mind. Every house-keeper, as well as traveler, should always keep a supply of some of these articles at hand, as they are perfect safeguards, either on sea or land. Our Wines are all original with ourselves, and we challenge the world for their equal.

 All orders or communications will receive prompt attention. All goods shipped from either of our Manufactories, we deliver on board of Boats or Cars, and take receipts for same, free of charge.

Would call the attention of the public to his

REVOLVING CLOTHES DRYERS

which possess the following advantages over any other mode of drying clothes. Its rotary motion produces a circulation of air causing the clothes to dry rapidly, and prevents the liability of their being torn. The labor and time in hanging up the articles to be dried and of taking them down are materially lessened. It

occupies but little space and may be set up in any yard however small, without inconvenience. This machine will be found to give entire satisfaction wherever it is used, and no family should be without one.

For particulars address, if by letter
POST OFFICE, LETTER BOX, 4287.

Orders will be promptly executed, and the machine put up in any part of the city at short notice.

NIMBS & ATHEARN,

(SUCCESSORS TO O. B. EVANS.)

No. 214 MAIN STREET, BUFFALO,

PHOTOGRAPHS, AMBROTYPES, DAGUERREOTYPES.

Plain Photographs of all Sizes and Prices to suit the most Fastidious.

Photographs executed in India Ink to equal the most finished engraving.

Photographs in India Ink, and beautifully tinted in water colors.

Photographs painted on Canvass, either Cabinet or Life Size.

These pictures surpass any other portrait ever produced, both in point of finish as well as in truthfulness to nature. Portraits produced by the Photographic process, do away entirely with those long and tedious sittings which are so much dreaded in obtaining a likeness by the old method, and securing at the same time a more perfect picture.

Persons residing a distance, having pictures, either of living or deceased friends, can have a perfect Life-sized Photograph painted in oil on canvass, by sending the picture, with a description of the person, giving the general complexion, color of the eyes and hair. By the Photographic process, there is no possibility of a failure in producing a perfect fac-simile of the original picture, no matter how small.

From our long experience in this line of Portraiture, we feel confidence in saying to the public, that in case of any picture failing to give satisfaction, we alone will be the losers.

The public generally suppose that a Photograph is different from the old style of oil painting; this is not the case, the "Photograph assist the artists in preserving the features," thereby rendering a failure impossible, and the picture equals, if not exceeds those produced by the old method.

The pictures produced at this Gallery are pronounced by connoisseurs in the art, to be superior to any in this State.

Photographs Colored in Oil are considered the Ultimatum of Portraiture.

The pictures to which were awarded the Diploma and Medal at the World's Fair in London in 1851, are on exhibition at this Gallery. Awarded at the State Fair in 1855, a Gold Medal for the best Photograph in Oil, Water and India Ink; also, at the late State Fair in Buffalo, the first premium for Photographs and Ambrotypes.

PICTURES TAKEN IN CLOUDY AS WELL AS IN CLEAR WEATHER

A. & J. KEOGH, Piano Forte Manufacturers,

NOS. 257, 259 and 261 WASHINGTON STREET,

Between North and South Division Streets,

The subscribers keep constantly on hand an extensive and choice assortment of Piano Fortes, in elegant Rosewood Cases, which we warrant to be equal in tone, touch and finish, to any manufactured in this country. As a proof of the superiority of our instruments, the subscribers would respectfully call the attention of the public to the subjoined testimonial from Professor Gottschalk, (one of the most distinguished pianists in this country,) being one of the many they are daily receiving from professors, and others, assuring them of the merits of their Pianos. Persons desirous of obtaining a superior instrument are earnestly invited to give us a call. Dealers supplied on liberal terms.

A. & J. KEOGH.

TESTIMONIAL.

SARATOGA, 27th July, 1856.

I was excessively satisfied with the piano which Mr. Richard Owen, of Quebec, was kind enough to lend me for my concert here.

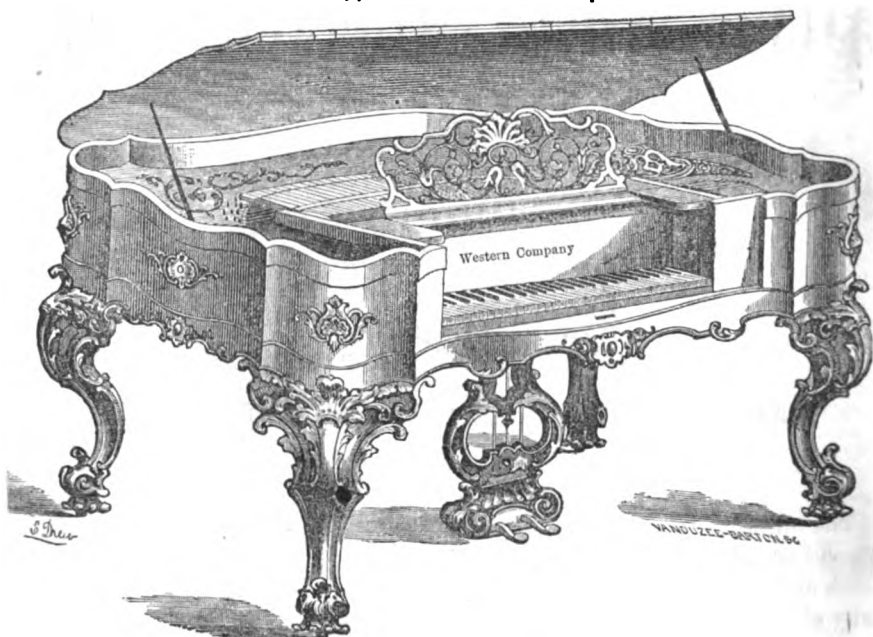

That instrument, of the manufacture of Messrs. A. & J. Keogh, of Buffalo, was one of the most powerful, if not the most powerful, two stringed square Pianos I had ever met with. The tone was full and round, without harshness, and of a remarkable evenness in all its registers. As to its strength, I will merely state the fact, that it stood at my concert during two hours, without intermission, under five or six heavy fantasias, and as many small pieces, in a moist and hot atmosphere, without one single string breaking, or the instrument getting out of tune, which is more than I could say of many grand pianos, even of the most eminent makers.

The Messrs. Keogh are personally unknown to me, and this was the first instrument of theirs I had ever performed on; my opinion, therefore, cannot be influenced by partiality. In recommending it, I simply respond to an artistic feeling, and a desire to do justice to manufacturers whose popularity is so well deserved.

Signed,

L. GOTTSCHALK.

SEELY'S PATENT**DRY DOCK**

MORE COMMONLY KNOWN AS

THE TUBULAR HINGE DOCK.

This dock is adapted to all kinds of Water Craft, and is applicable to every purpose for which dry docks are used. It may be easily and cheaply built in any

HARBOR, RIVER, CREEK, CANAL, &c.

where a dry dock is needed; and is considered the most convenient and economical dry dock in the World. Among the many advantages claimed for this invention, the following will suffice to establish its superiority:

1. It can be built at less cost than any other.
2. It will dock a vessel in less time than any other.
3. It requires less hand help than any other.
4. It receives and discharges vessels, while others are in Dock.
5. It docks loaded vessels as easily and safely as light ones.
6. It docks the vessel in all cases without straining it.

The plan is such that the bed-plates on which the keel of the vessel is received in docking most necessarily conform to the shape of the keel throughout its entire length, so that the vessel rests as lightly on its dock-supports as though buoyed by water.)

7. By an additional expense of less than twenty dollars, it may be so constructed as to serve all the purposes of a Weigh Lock.

Ship and Boat Builders, Owners of Vessels, Transportation Companies, Underwriters, and all persons directly or indirectly interested, are invited to call and examine the working Model now in possession of the inventor, Mr. John Seely at

No. 326 MICHIGAN St., BUFFALO.

BUFFALO GYMNASIUM

No. 24 and 26 Pearl Street, Third Floor.

The undersigned continues to keep open his Gymnasium, and would call the attention of his former patrons and the public generally to the advantages of well directed and systematic exercise.

The exercises of the Gymnasium favor the preservation of the general health, by calling into direct action the majority of the organs of the body, and also act powerfully upon the skin, stimulating its functions, increasing its temperature, awakening its tone, and promoting that evaporation through the pores by which the waste matter of the system is carried off.

Consumption, Dyspepsia, Nervous Complaints,

DISEASES OF THE SPINE, AND MANY BODILY DEFORMITIES,

Are engendered by a want of proper exercise; that is, exercise which will expand the chest, invigorate the muscles, and give a man confidence in his own bodily powers.

EXERCISE,

Therefore, is important, in order to keep the physical machinery in a condition to resist unhealthy influences, or to expel them, should they attack any of the internal organs; and as all portions of the body are liable to become the seat of disease, it is obvious that the system of exercise which brings all the limbs and muscles into requisition must be the most beneficial. Walking will not do this, nor riding, nor any one species of muscular exertion.

IT CAN ONLY BE ACCOMPLISHED IN THE GYMNASIUM.

Where all parts of the frame are alternately brought into a state of activity.
